

A woman with dark hair, wearing a black and white top, is sitting and reading a book. The background is a blurred indoor setting with a window and some furniture.

Learn to code in only two days!

Coding is the language of the digital age, which powers all the computer systems, apps, websites and software that we use every day. If you are interested in learning how to code, this two-day training course would be perfect for you. You will be introduced to the basics of coding and gain a better understanding of how coding enables us to communicate to our computers exactly what we want them to do.

For anyone who wants to understand the basics of coding

No coding experience is required for this course – it does not matter if you have dabbled in coding previously or have never written a single line of code. During the course, you will learn how coding works and will be guided through the basics of coding using the Python programming language.

Learning by doing

The course will provide an introduction to fundamental programming concepts as well as the Python programming language. Used by many professional programmers, Python is one of the most powerful programming languages – and one of the easiest to learn as well.

By the end of the two-day training course, you will be...

- Able to grasp key programming concepts and understand the significance of coding in our daily lives.
- Familiar with Python syntax.
- Capable of creating a Python programme and demonstrating its functionality to the rest of the group

Time and financial investment

This two-day course will run from 9:00 AM to 5:00 PM. You will need to bring your **own laptop**.

The total cost of the course is €1,295,- which includes study materials and catering but excludes VAT.

Next training: February 2019
